

CHEM-CREST 77

Chem-Crest 77 provides a very thin invisible film for short-term protection and desorbes under vacuum which makes it an excellent rust inhibitor for parts intended to be vacuum coated. **Not suitable for aluminum or zinc.**

CHEM-CREST 77C

Chem-Crest 77C provides a film for long-term protection. It may be injected into the rinses or can be used in a separate stage. **Safe on multi-metal components, e.g., aluminum, brass, and copper.**

Disclaimer: All statements, technical information and recommendation contained herein are based on tests or other information available to us which we believe to be reliable, but the accuracy or completeness thereof is not guaranteed and are made without representation or warranty. They are presented for your own investigation and verification. Products discussed are sold without warranty, expressed or implied, in law or fact and upon the condition that purchasers make their own tests to determine the suitability of such products to their particular purpose. We shall not be liable for any injury, loss or damage direct or consequential, arising out of use or the inability to use the product. It is the user's obligation and responsibility to determine that any use of the product or the information may infringe on patent rights.

All CHEM-CREST 77 formulas are efficient in protecting iron and rustable steels during rinses and air drying.

Use concentration: 1-2% rinse injection

CHEM-CREST 77G

Chem-Crest 77G provides short-term protection. It is typically used for medical and pharmaceutical applications where rust inhibition is needed. CHEM-CREST 77G is alkaline and must be handled according to its MSDS. **Not suitable for aluminum or zinc.**

CHEM-CREST 77E

Chem-Crest 77E provides short-term protection and is economical for applications using high overflow water rinses (> 2 GPM). **Not suitable for aluminum or zinc.**
